

How do I measure my hair?

1. Take a hair, be careful not to lose it!
... stick it over the hole ...

2. cut out the paper,
... let the laser shine through the hair! ...

3. Draw the spots you see on the target paper,
Put the brightest spot in the center!

Measure!

4. The distance from laser to target is _____ m
• The distance from center to spot number ____ is _____ mm

The laser "wavelength" is _____ nm

↖ (this is written on the laser)

5. Enter the values in the computer,
• Let it calculate the thickness of your hair!
